

## **A23: Chelsea City**

*Drinking Water: Well Information*

**None.**

*Drinking Water: Consumer Confidence Report Summary*

**City of Chelsea:** Water comes from five wells ranging between forty and sixty feet deep. All five wells have an overlying clay layer that acts as a natural barrier against contaminants. A new water treatment plant removes manganese and softens the water using a Reverse Osmosis technique. The water is aerated and potassium permanganate is added as an oxidizer. Chlorine is added as a disinfectant. Fluoride is added for dental health.

*Surface Water Features:* **Letts Creek, Pierce Lake.**

*Local Indicator Data*

Chelsea City had one TMDL site for Letts Creek for fish and macroinvertebrate communities rated poor but it has been removed from the TMDL schedule. It has three Part 201 Sites. It has five NPDES permits for storm water and one NPDES pollutant discharge permit. Chelsea City has 31 UST sites, seven LUST, and five AST sites.
