

Corvids*, Robins, and Other Dead Birds Reported for West Nile Virus Surveillance (As of September 2, 2008)

Legend (total report: n=101)

Dead Corvids Reported (n=24)

-  Tested - Positive (n=3)
-  Tested - Negative (n=3)
-  Not Tested (n=18)

Dead Robins Reported (n= 30)

-  Not Tested

Other Dead Birds Reported (n= 47)

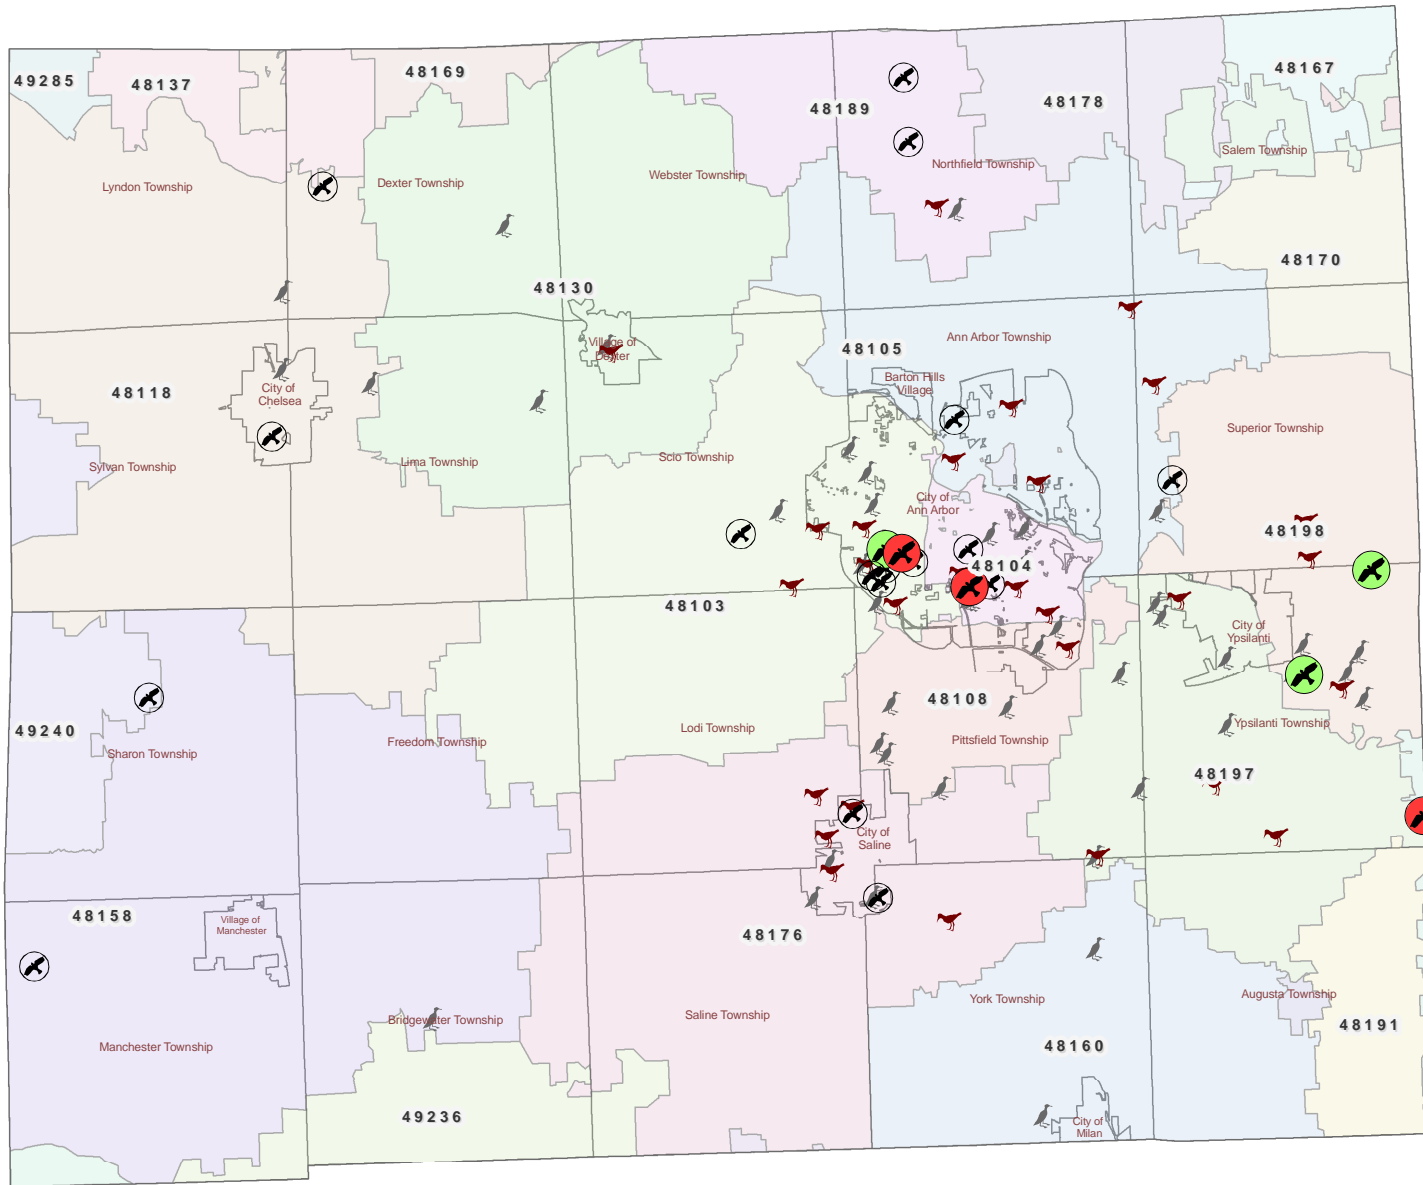

-  Not Tested
-  Municipal Boundary

* Corvids are birds from the family Corvidae e.g., crows, ravens and blue jays.

Notes:
Dead bird sightings are a possible early warning sign of West Nile virus activity, but not definitive confirmation.

Corvids (birds) die of many causes, and reporting levels may vary among townships and zip codes.

Data collected from the Washtenaw County West Nile Virus Hotline - (734) 544-6750 and the MDNR West Nile Virus Sick and Dead Bird Observation Report Form, online at www.michigan.gov/westnilevirus
