

- How extensive of a water quality model are you interested in developing? For example, are you open to a simple "tool" with the intent of assisting with BMP selection at a specific site or would you like a comprehensive model that evaluates the entire watershed?

A simple tool with the intent of assisting with BMP selection at a specific site. However, the effective load reduction watershed-wide should be assessed as best as possible.

- Are the GIS layers from the 2001 Allen's Creek Watershed Management Plan available?

All County and City GIS data required will be made available to the successful bidder.

- Do you mind if we partner with other firms?

It is encouraged. Please note that public involvement facilitation is an important element of the project.

Can the following documents be made available digitally? If not, would they be available in hard copy for us to pick up?

- Black & Veatch, 1995, Murray-Washington Analyses Detention Options in the Upper Reaches.
- Enerson, J. 1970.... Flood Problems and Perceptions in Allen's Creek Drainage
- McNamee, Porter and Seeley, 1995 Depot Street and Allen's Creek Drain Groundwater Investigation for Washtenaw County Drain Commission
- McNamee, Porter and Seeley, 1978... Report on Liberty Street Retention Basin
- Meier, P.G. and Garmin.... The Impact of Allen's Drain Water on the Flora and Fauna Indigenous to the Huron River
- University of Michigan Storm water Study
- MCI Liberty Glendale Study

Since I have gotten only one request for these documents and the request is broad, I will make a hard copy available for review here at the drain office by appointment. Afterwards, if you need a takeaway copy(s), I will have the document(s) scanned for distribution. Please plan to come by tomorrow or Monday. Friday is a County holiday.
