A. Washtenaw County reserves the right to reject any and all proposals received as a result of this RFP. The County does not intend to award a contract fully on the basis of any response made to the proposal; the County reserves the right to consider proposals for modifications at any time before a contract would be awarded, and negotiations would be undertaken with that contractor whose proposal is deemed to best meet the County’s specifications and needs.

B. The County reserves the right to reject any or all bids, to waive or not waive informalities or irregularities in bids or bidding procedures, and to accept or further negotiate cost, terms, or conditions of any bid determined by the County to be in the best interests of the County even though not the lowest bid.

F. A standard Washtenaw County Services Agreement will be executed between Washtenaw County and the consultant (see Appendix A). Washtenaw County reserves the right to award the total proposal, to reject any and all proposals in whole or in part, and to waive any informality or technical defects if, in Washtenaw County’s sole judgment, the best interests of Washtenaw County will be so served.

PROPOSAL SPECIFICS

I. Project Purpose

The intent of this document is to provide interested consultants with sufficient information to enable them to prepare and submit proposals for consideration by the Washtenaw County Facilities Management (WCFM) for the **Design Build Services** required to design, supply, install build a new entry vestibule for the **Trial Court located at 101 E. Huron.**

*This project must proceed on an **accelerated 30 day construction schedule.** Contractors must be committed to meeting the schedule in Section VI. of this proposal (page 5) as a requirement for selection by WCFM.*

II. Description and Purpose of Proposed Work

The remodel of the security vestibule will include interior remodeling and minor exterior work. The schedule for this project is critical, after approval of plans and acquirement of materials the main public entry will be closed for 30 days to allow demolition and new construction. No time extensions will be allowed during the construction phase. The current facility houses a fully occupied functioning courthouse. Design and Construction must allow for and consider normal operations of the courthouse to continue throughout the project. The goal of this project is to provide a full functioning entry vestibule to help secure traffic in and out of the facility. All proposed contractors will require background check before entering the site for work.

The county will provide the contractor with proposed drawings.

At present, the elements include:

- Existing plan
- Proposed plan
- Basic construction notes
- Basic specifications

This bid must include pricing for all necessary engineering.

III. Scope of Services

Washtenaw County wishes to obtain the services of a qualified Design Build firm in preparing the design, supply, install, build and coordination necessary for the accomplishment of this project.

The project will be performed in the following phases:

PHASE 1: FIELD INVESTIGATION

1. Review the existing materials, drawings, reports, etc., prepared by county staff on the proposed facility.
2. Review the proposed plans.
3. Review the existing infrastructure in the facility.

PHASE 2: PLAN REVIEW WITH COUNTY STAFF AND APPROVAL

In this phase the selected contractor will be responsible to review finalized permit drawings with county staff. This phase will also include an agreement on a finalized construction schedule.

1. Facilities Management staff review and approval of the final and complete construction drawings, shop drawings and submittals prior to contractor starting work.

PHASE 3: CONSTRUCTION

In this phase the selected contractor will supply and install all labor materials and equipment to install the approved drawings. The contractor will order and store all materials offsite prior to construction starting. The contractor will be responsible for all construction activities including but not limited to (permits, coordination and sign off with county staff, weekly updates, testing, inspection, temporary signage, barricades, etc).

IV. Project Control

1. The contractor will meet with selected representatives on a regular basis or as determined necessary by the Facilities Management project manager to review progress and provide necessary guidance to the contractor in solving problems which may arise.
2. Although there will be continuous liaison with the project team, the Facilities Management project manager will meet as often as required with the contractor's project manager for the purpose of reviewing progress and providing necessary guidance.

3. The contractor will, on a regular basis, submit brief written summaries of the work accomplished during the reporting period, work to be accomplished during the subsequent reporting period, real or anticipated problems and notification of any significant deviation from previously agreed upon work plans.
4. Within 10 working days of the award of the contract, the consultant will submit to the county's project manager for approval a work plan, which includes the following:
 - a. The contractor's names and titles of personnel assigned to the project
 - b. The project breakdown showing subprojects, activities and tasks
 - c. The time-phased plan for completing the project

V. Submittal Process and Details

Proposals are sought from firms with recognized expertise with Design Build projects with experience in the public sector. Proposals should include the following:

1. Contractor's name, address, and name of primary contact person.
2. A description of the specific staff who will comprise the project team for this assignment.
3. Samples of related/comparable past projects that would serve as examples of experience and expertise necessary for this project.
4. Statement of qualifications and experience with public sector work.
5. Estimated time commitment for each staff person as a percentage of the total time to complete the work.
6. Expected workload during the project period, (i.e., readiness to serve).
7. Evidence of ability to work within tight time constraints.
8. Location and availability of intended subcontractors. (While the County does not require consultants to be local firms, availability to discuss design questions is a primary concern).
9. List of client references.
10. A proposed fee structure for the work to be performed, including costs from all anticipated subcontractors. This information must be included in the proposal.

It is not the intent of this RFP to solicit an overly long response, but it is important the firm's experience/expertise be adequately described. It will, for example, be much more useful to address abilities and expertise directly comparable to this project than to include an exhaustive list of all projects completed by the firm. WCFM staff will review the submitted proposals and will select firms to meet with in an interview format, to discuss the project and contractor qualifications, in greater detail. The selected contractor will meet with the County to negotiate compensation for the project, and

prepare a contractual agreement between the County and the contractor, as soon after the final selection as is reasonable.

VI. Preliminary Schedule

A project schedule shall be provided demonstrating the time elements in weekly intervals. This project schedule must consider all major elements and their relations, as described in the Scope of Services.
