

IV. Park Features and Amenities

- 1. Multi-Use Trails**
- 2. Picnic Areas and Pavilions**
- 3. Playgrounds for Children**
- 4. Water Park (wave pool, spray park, lazy river, water slides)**
- 5. Disc Golf Course**
- 5a. Disc Golf Learning Center**
- 6. Fishing/Nature Observation (Spring Pond)**
- 7. Sledding / The "Lodge"**
- 8. Community Recreation Center**
- 9. Soccer Fields/Active Sport Fields/Cricket**
- 10. Baseball/Softball Fields**
- 10a. Miracle Baseball Field**
- 11. Golf Learning Center**
- 12. Adventure Playground**
- 13. Natural Area Interpretation**
- 14. Dog Park**
- 15. Mountain Bike Technical/BMX Courses**
- 16. Amphitheater**
- 17. Maintenance Facilities**
- 18. Promenade**

1. MULTI-USE TRAILS

A series of interrelated, interconnected trail and path systems are incorporated into the park plan. Every park feature and activity is safely accessible by foot or bicycle. One of the qualities of the park as a destination is that a visitor can come to the park for a particular event, and stay the day, moving from place to place either by car or by foot or bicycle. Or, a family or group can arrive in a single vehicle, and circulate to different parts of the park based upon interest. In addition to circulation and access, the trail system is itself one of the recreational amenities. Trail loops of differing lengths and materials provide opportunities for walking, jogging and running, rollerblading, cycling, and trail riding.

2. PAVILIONS, PICNIC AREAS AND OPEN PLAY

In addition to the picnic pavilions that currently exist, and get a great amount of use, several more will be added throughout the park. The intent is that these facilities provide clean, comfortable structures in a beautiful, natural setting. Some will come to the park to picnic as part of their outing, spreading a blanket on the open ground along a hedgerow; others will come for an event and plan to picnic at a table while participating in or being a spectator of a particular activity. Picnic facilities are placed in strategic locations to serve a wide range of potential visitors and situations. Additional facilities will provide greater opportunity for families and groups to reserve picnic facilities for gatherings, outings, and celebrations.

3. PLAYGROUNDS FOR CHILDREN

With a strong focus on children, Rolling Hills Park will continue to be a place for both organized activities and casual, informal play- exploring, climbing, and experiencing a wide range of outdoor play. Structured play facilities for all age categories are located throughout the park to provide play space within close proximity to soccer and baseball fields, and several other locations. Some of these playgrounds are envisioned as more interactive, challenging play equipment and features in play spaces to provide a wider range of enjoyment and experience.

4. WATER PARK (EXPANDED)

As one of the primary activities at Rolling Hills Park in the summer months, the popular waterpark is planned to be expanded. A new bath house, additional water features, and additional parking capacity are all planned to meet current and future needs. Like all proposed parking facilities, rainwater treatment and biofiltration are anticipated to be integrated into the design of the new parking lots. Along the perimeter of the lots, a water landscape (including rain gardens and created wetlands) will provide this rainwater treatment, while also offering an attractive landscape that reinforces the water theme, provides habitat, and enhances the park experience. Picnic pavilions will be located around this perimeter to facilitate greater enjoyment of the water park. Additionally, a water-themed miniature golf facility is proposed at the north end of the water park, to provide an additional amenity in the vicinity of the water park.
